PUBLICATION ETHICS AND MALPRACTICE STATEMENT

Jurnal Riset Pendidikan Matematika is a peer-reviewed electronic journal. This statement clarifies ethical behaviour of all parties involved in the act of publishing an article in this journal, including the author, the chief editor, the Editorial Board, the peer-reviewer and the publisher (Department of Mathematics Education, the Graduate School of Universitas Negeri Yogyakarta). This statement is based on COPE’s Best Practice Guidelines for Journal Editors.

Ethical Guideline for Journal Publication

The publication of a peer-reviewed article in of Jurnal Riset Pendidikan Matematika is an essential building block in the development of a coherent and respected network of knowledge. It is a direct reflection of the quality of the work of the authors and the institutions that support them. Peer-reviewed articles support and embody the scientific method. It is therefore important to agree upon standards of expected ethical behavior for all parties involved in the act of publishing: the author, the journal editor, the peer reviewer, the publisher, and the society.

Department of Mathematics Education, the Graduate School of Universitas Negeri Yogyakarta as the publisher of Jurnal Riset Pendidikan Matematika takes its duties of guardianship over all stages of publishing extremely seriously and we recognize our ethical and other responsibilities. We are committed to ensuring that advertising, reprint or other commercial revenue has no impact or influence on editorial decisions. In addition, Department of Mathematics Education, the Graduate School of Universitas Negeri Yogyakarta and Editorial Board will assist in communications with other journals and/or publishers where this is useful and necessary.

Publication decisions

The editor of the Jurnal Riset Pendidikan Matematika is responsible for deciding which of the articles submitted to the journal should be published. The validation of the work in question and its importance to researchers and readers must always drive such decisions. The editors may be guided by the policies of the journal's editorial board and constrained by such legal requirements as shall then be in force regarding libel, copyright infringement and plagiarism. The editors may confer with other editors or reviewers in making this decision.

Fair play

An editor at any time evaluates manuscripts for their intellectual content without regard to race, gender, sexual orientation, religious belief, ethnic origin, citizenship, or political philosophy of the authors.

Confidentiality

The editor and any editorial staff must not disclose any information about a submitted manuscript to anyone other than the corresponding author, reviewers, potential reviewers, other editorial advisers, and the publisher, as appropriate.

Disclosure and conflicts of interest

Unpublished materials disclosed in a submitted manuscript must not be used in an editor's own research without the express written consent of the author.

Duties of Reviewers

Contribution to Editorial Decisions

Peer review assists the editor in making editorial decisions and through the editorial communications with the author may also assist the author in improving the paper.

Promptness

Any selected referee who feels unqualified to review the research reported in a manuscript or knows that its prompt review will be impossible should notify the editor and excuse himself from the review process.

Confidentiality

Any manuscripts received for review must be treated as confidential documents. They must not be shown to or discussed with others except as authorized by the editor.

Standards of Objectivity

Reviews should be conducted objectively. Personal criticism of the author is inappropriate. Referees should express their views clearly with supporting arguments.

Acknowledgement of Sources

Reviewers should identify relevant published work that has not been cited by the authors. Any statement that an observation, derivation, or argument had been previously reported should be accompanied by the relevant...
citation. A reviewer should also call to the editor's attention any substantial similarity or overlap between the manuscript under consideration and any other published paper of which they have personal knowledge.

Disclosure and Conflict of Interest
Privileged information or ideas obtained through peer review must be kept confidential and not used for personal advantage. Reviewers should not consider manuscripts in which they have conflicts of interest resulting from competitive, collaborative, or other relationships or connections with any of the authors, companies, or institutions connected to the papers.

Duties of Authors
Reporting standards
Authors of reports of original research should present an accurate account of the work performed as well as an objective discussion of its significance. Underlying data should be represented accurately in the paper. A paper should contain sufficient detail and references to permit others to replicate the work. Fraudulent or knowingly inaccurate statements constitute unethical behaviour and are unacceptable.

Data Access and Retention
Authors are asked to provide the raw data in connection with a paper for editorial review, and should be prepared to provide public access to such data (consistent with the ALPSP-STM Statement on Data and Databases), if practicable, and should in any event be prepared to retain such data for a reasonable time after publication.

Originality and Plagiarism
The authors should ensure that they have written entirely original works, and if the authors have used the work and/or words of others that this has been appropriately cited or quoted.

Multiple, Redundant or Concurrent Publication
An author should not in general publish manuscripts describing essentially the same research in more than one journal or primary publication. Submitting the same manuscript to more than one journal concurrently constitutes unethical publishing behaviour and is unacceptable.

Acknowledgement of Sources
Proper acknowledgment of the work of others must always be given. Authors should cite publications that have been influential in determining the nature of the reported work.

Authorship of the Paper
Authorship should be limited to those who have made a significant contribution to the conception, design, execution, or interpretation of the reported study. All those who have made significant contributions should be listed as co-authors. Where there are others who have participated in certain substantive aspects of the research project, they should be acknowledged or listed as contributors. The corresponding author should ensure that all appropriate co-authors and no inappropriate co-authors are included on the paper, and that all co-authors have seen and approved the final version of the paper and have agreed to its submission for publication.

Hazards and Human or Animal Subjects
If the work involves chemicals, procedures or equipment that have any unusual hazards inherent in their use, the author must clearly identify these in the manuscript.

Disclosure and Conflicts of Interest
All authors should disclose in their manuscript any financial or other substantive conflict of interest that might be construed to influence the results or interpretation of their manuscript. All sources of financial support for the project should be disclosed.

Fundamental errors in published works
When an author discovers a significant error or inaccuracy in his/her own published work, it is the author’s obligation to promptly notify the journal editor or publisher and cooperate with the editor to retract or correct the paper.

AUTHORS’ BIOGRAPHY

Adhetia Martyanti
Adhetia Martyanti is a Lecturer in the Department of Mathematics Education, Alma Ata University, Yogyakarta. She completed her undergraduate education in the Mathematics Education Study Program, Universitas Negeri Yogyakarta in 2011. Then, she has completed her postgraduate education in the Mathematics Education Study Program, Graduate Program, Universitas Negeri Yogyakarta. She has the h-index 1 in the Google Scholar profile. The author might be reached in the following email address: adhetia.martyanti@yahoo.co.id and phone number: +6285729089011.

Dian Wijayanti
Dian Wijayanti is a Teacher in the Negeri 3 State Elementary School Maospati, Magetan. She completed her undergraduate education in the Mathematics Education Study Program, Universitas Negeri Yogyakarta, in 2004. Then, she completed her postgraduate education in the Mathematics Education Study Program, Graduate Program, Universitas Negeri Yogyakarta, in 2015. The author might be reached in the following e-mail address: d.vijayanti@gmail.com and phone number: +6285815840989.

Faridah Hernawati
Faridah Hernawati is a teacher in the Negeri 4 State Junior High School, Kalijajar, the County of Wonosobo. She completed her undergraduate education in the Mathematics Education Study Program, Sunan Kalijaga State Islamic University Yogyakarta, in 2004. Then, she has recently completed her postgraduate education in the Mathematics Education Study Program, Graduate Program, Universitas Negeri Yogyakarta, in 2015. The author might be reached in the following e-mail address: reads0386@gmail.com and phone number: +6285385668043.

H. Hartono
Hartono is a Lecturer in the Mathematics Education Study Program, Universitas Negeri Yogyakarta. He completed his undergraduate education in the Department of Mathematics, Gadjah Mada University, in 1986. Then, he completed his postgraduate education in the Department of Mathematics, Institute of Technology Bandung, in 1994. He completed his Graduate education in the Delft University of Technology, Netherlands, in 2004. He has the Scopus ID: 7409903699 with h-index 4 and he has the h-index 2 in the Google Scholar profile. The author might be reached in the following e-mail address: hartono@uny.ac.id and phone number: +6285228038143.

Idris Harta
Idris Harta is a Lecturer in the Muhammadiyah University Surakarta. He completed his undergraduate education in the Institute of Teachers Training and Education Bandung in 1983. Then, he completed his postgraduate education in the SUNY, Brockport, New York, in 1988. He completed his Graduate education in the University of Iowa, Iowa City, Iowa, in 2000. The author might be reached in the following e-mail address: idrisharta@gmail.com.

Juliana Rakony Untayana
Juliana Rakony Untayana was born in Ambon on October 20th, 1972. She pursued her undergraduate education in the Mathematics Education Study Program, Cenderawasih University, Jayapura, from 1994 to 1999. Then, she pursued her postgraduate education in the Mathematics Education Study Program, Graduate Program, Universitas Negeri Yogyakarta from 2013 to 2015. The author might be reached in the following e-mail address: Juliana.untajana@gmail.com.
Meita Fitrianawati
Meita Fitrianawati is a Lecturer in the Faculty of Elementary School Teacher Education, Ahmad Dahlan University. She completed her undergraduate education in the Mathematics Education Study Program, Universitas Negeri Yogyakarta, in 2012 and her magistrate education in the Mathematics Education Study Program, Universitas Negeri Yogyakarta, in 2015. The author might be reached in the following e-mail address: meitafitrianawati@gmail.com and phone number: +6285643226760.

Muhammad Fajaruddin Atsnan
Muhammad Fajaruddin Atsnan is a Lecturer in the Mathematics Education Study Program, The Union of Indonesian Teachers Academy of Teachers Training and Education, Banjarmasin. He completed his undergraduate education in the Mathematics Education Study Program, Universitas Negeri Yogyakarta, in 2010. Then, he completed his postgraduate education in the Mathematics Education Study Program, Universitas Negeri Yogyakarta, in 2014. He has been actively composing the Mathematics books for the junior high school, senior high school and vocational high school degree; the educational books; Ensiklopedia Empat Pilar Kebangsaan; Ensiklopedia Narkoba published by Penerbit Andi Yogyakarta; opinions in the Banjarmasin Post. The author might be reached in the following e-mail address: ats_krnbangettt@yahoo.co.id and phone number: +6287839494083.

Nanang Khuzaini
Nanang Khuzaini was born in June 4th, 1987. He completed his undergraduate education in the Mathematics Education, Sunan Kalijaga State Islamic University Yogyakarta. Then, he completed his postgraduate education in the Mathematics Education Study Program, Graduate Program, Universitas Negeri Yogyakarta. The author might be reached in the following e-mail address: nanangkhuzaini@gmail.com and phone number: +628562563729.

N. Novferma
Novferma is a Lecturer in the Department of Mathematics Education, Jambi University. She was born in Tanjung Raden on November 4th, 1990. She completed her undergraduate education in the Mathematics Education Study Program, Jambi University, in 2012. Then, she completed his postgraduate education in the Mathematics Education Study Program, Universitas Negeri Yogyakarta, in 2015. The author might be reached in the following e-mail address: novferma@gmail.com and phone number: +6285266077090.

Risnawati Aamiluddin
Risnawati Aamiluddin is a Lecturer in the Department of Mathematics Education, Dayanu Ikhsanuddin University Bau-Bau. She completed his undergraduate education in the Mathematics Education Study Program, Dayanu Ikhsanuddin University Bau-Bau, in 2010. Then, he completed his postgraduate education in the Mathematics Education Study Program, Graduate Study Program, Universitas Negeri Yogyakarta. The author might be reached in the following e-mail address: risnawatilili@gmail.com and phone number: +6282225097013.

Rusgianto Heri Santosa
Rusgianto Heri Santosa is a Professor of Learning Technology in the Universitas Negeri Yogyakarta. He earned his Bachelor degree in the Science Education in 1971. While he was working as a teacher, he earned his Educational Baccalaureate in the Science Education in 1978. Then, he graduated from the Magister of Education Study Program, Graduate Program, Institute of Teachers Training and Education Jakarta. He earned the degree of Educational Doctor in 2001 from the Faculty of Graduate Program, Jakarta State University. He has the h-index 0 in the Google Scholar profile. The author might be reached in the following e-mail address: santosa_rh@yahoo.co.id.

S. Sugiman
Sugiman has been a Lecturer in the Department of Mathematics Education, Universitas Negeri Yogyakarta, since 1991. He completed his undergraduate education in the Department of Mathematics Education, Institute of Teachers Training and Education Yogyakarta, in 1989. Then, he completed his magister program in the Department of Mathematics Education, Institute of Technology Bandung, in
1997. He completed his doctoral program in the Mathematics Education Study Program, Graduate Program, Indonesian Education University, in 2010. He has the h-index 2 in the Google Scholar profile. The author might be reached in the following e-mail: sugiman@uny.ac.id.

**Wiwin Rita Sari**
Wiwin Rita Sari was born in Central Lampung on July 28th, 1989. She completed her undergraduate education in the Mathematics Education Study Program, Ma’arif NU State Institute of Islam Religion Lampung in 2012. Then, she completed her postgraduate education study program in the Graduate Program, Universitas Negeri Yogyakarta, in 2014. The author might be reached in the following e-mail address: wiwin.ritasari@gmail.com and phone number: +6285669704061.

**Yuni Ristanti**
Yuni Ristanti is a Classroom Teacher in the Negeri 15 State Elementary School Ulu Gadut, Sub-County of Pauh, City of Padang. She completed her diploma (Diploma-2) education in the Elementary School Teacher Education Study Program, Institute of Teachers Training and Education Padang, in 1998. Then, she completed her undergraduate education in the Department of Elementary School Teacher Education, Universitas Terbuka, in 2010. Next, she completed her postgraduate education in the Elementary Education Study Program, Universitas Negeri Yogyakarta, in 2015. The author might be reached in the following e-mail address: yuniristanti@gmail.com and phone number: +6281374971643.
ACKNOWLEDGMENT TO REVIEWERS IN THIS ISSUE

Contribution from the following Reviewers in this issue was very appreciated for their valuable review comments:

Endah Retnowati *(Universitas Negeri Yogyakarta, Indonesia)*
Ariyadi Wijaya *(Universitas Negeri Yogyakarta, Indonesia)*
Jailani *(Universitas Negeri Yogyakarta, Indonesia)*
Rooselyna Ekawati *(Universitas Negeri Surabaya, Indonesia)*
Agus Santosa *(Universitas Terbuka, Indonesia)*
Kartono *(Universitas Negeri Semarang, Indonesia)*
Wahyu Setyaningrum *(Universitas Negeri Yogyakarta, Indonesia)*
Ipung Yuwono *(State University of Malang, Indonesia)*
INTRODUCTION

This section contains the background of the study, the rationale and/or the urgency of the study. References (literatures and relevant studies) should be stated in relation to the justification toward the urgency of the study, the occurrence of the problem in the study, the alternative solutions and the selected solutions. The manner of stating the sources in the text must show the name of the author and the source citation clearly, which refers to the year of issuance or publication and the page where the related texts exist. For example: ... The results of the study showed that more than 70% of the students had not been able to recognize the authentic problems … (Retnawati, 2014, p.6).

The degree of advancement within the materials that have been the reference should be given attention by viewing the proportion of the last 10 years and by looking at the primary literature. The problems, the objectives and the benefits of the study should be typed narratively in the form of paragraphs and the researcher does not need to provide any special sub-sections. Similarly, the operational definition might be typed narratively if it is deemed necessary.

The sub-title Introduction should be typed in TNR-11 straight with single space. Each paragraph should be started with the word that is indented inward 5 digits or around 1 cm from the left side of each column.

METHOD

This section contains the type, the period, the location, the target, the subject, the procedures, the instruments and the data analysis technique of the study along with the other matters that have been related to the manners of the study. These contents might be typed into the subtitles with the subheadings. The subtitles do not need to be provided with notation. However, the subtitles should be typed with the small case beginning with a capitalized letter, TNR-11 un-bold and left level.

Especially for the qualitative study, the period and the location of the study should be stated clearly (as well as for the quantitative study). The target/subject of the study (for the qualitative study) or the population-sample (for
the quantitative study) should be elaborated clearly in the section. The researcher should also write the subject selection technique (for the qualitative study) and/or the sampling technique (for the quantitative study).

The procedures should be elaborated in accordance to the type of the study. In addition, the researcher should also elaborate how the study was conducted and how the data had been attained.

For the experimental study, the type of experimental design that had been implemented should be written in this section. The type of the data, how the data had been gathered, which instrument that had been used in gathering the data and the technique that had been used in gathering the data should be elaborated clearly as well in this section.

Furthermore, the meaning of the data and the connection between the data, the problems of the study and the objectives of the study should be elaborated in this section.

(Note: The subtitles might be different according to the type or the approach of the study that had been implemented. If there were sequential steps or procedures then the steps or the procedures might be provided with the notation (number or letter) according to the position.)

RESULTS AND DISCUSSIONS

The results of the study should be presented in the form of graphic, table or descriptive explanation. The analysis and the interpretation toward these results are necessary before starting the discussion.

The table should be written in the middle or in the end of each descriptive text discussing the results/findings of the study. If the width of the table is not sufficient to be written in the half page, then the table might be written in the full page. The title of the table should be written from the left to the center and all of the words should be started with the capital letter except for the conjunctions. If the title consists of more than one line, then the title might be written completely in the single space. The example for this explanation might be seen in Table 1.

And more

The elaboration of the results that take the form of figure or the data that have been explained by means of figure/scheme/graphic/diagram and alike should pay attention to the existing rules; the title or the name of the figure should be put under the figure, should be written from the left to the right and should be given a single space from the figure. If the name consists of more than one line, the researcher can provide a single space between the lines. The example for this explanation might be seen in Figure 1.

![Figure 1. Displaying the Style in the Template](image-url)
The discussions should be focused to the association between the data and the results of analysis or the association between objectives of the study and the wider theoretical context. The discussions might also deal with the answers toward the questions of why such facts had been found in the data.

The discussions should be written closely to the data that had been discussed. The discussions should not be written separately from the data under discussion.

CONCLUSIONS

The conclusions might be some sort of generalization toward the findings in accordance with the problems of the study. The conclusions, on the other hand, might also be the recommendations for the further steps or stages.

REFERENCES

The composition of the list of references should follow the standard techniques and should be performed under the standardized and consistent manner. In order to maintain the consistency of reference and quotation manner, the list of references should make use of Reference Manager Applications such as Zotero, Mendeley or the paid applications. The list of references should be typed in the single space and there should be a single space-distance from one list of reference to another. An example for this explanation might be seen in the following example.

AUTHOR GUIDELINES

1. Manuscript accepted is written in standard English Language or Indonesian language
2. The length of the manuscript is approximately 15 pages (or approximately 7000 words), written in Times New Roman 11, A4 paper format, margins: top 3; left 3; right 2; bottom 2, two columns (except for abstract, figure or table whose size cannot be reduced due to its readability), justified, single-spaced.
3. Manuscript comprises five main headings: Pendahuluan (Introduction); Metode (Method); Hasil dan Pembahasan (Findings and Discussion); Simpulan (Conclusions); Daftar Pustaka (References).
4. The title of the manuscript must be as brief as possible, and must represent the content of the manuscript.
5. Authors’ names are written below the title, followed by authors’ affiliation (name of the affiliation, address, postal code, and country) and e-mail address.
6. Abstract is written in two languages: Indonesian and English or only in English if the fulltext is written in English, as a representation of the manuscript. The abstract should not exceed 250 words for each language format, written narratively comprising aims/objectives, method, and findings of the research/article, in one paragraph.
7. Keywords: words or phrases which are important, specific, or representative to the article.
8. APA style is used as a reference in citation, references, and writing format.
9. The references of the article are in the form of journals and non-journals which are published in the last 10 years.
10. The manuscript should be written in the following TEMPLATE.
11. The manuscript must be in Microsoft Word (.doc/ .docx or .rtf), and sent to the journal system via online submission by creating account in this Open Journal System (OJS) [click REGISTER if you have not had any account yet; or click LOG IN if you have already had an account].
12. All Author(s)' names and identity(es) must be completely embedded in the form filled in by the corresponding author: email; affiliation; and each author's short biography (in the column of 'Bio Statement'). [If the manuscript is written by two or more authors, please click 'Add Author' in the 3rd step of 'ENTER METADATA' in the submission process and then enter each author's data.]
13. Authors’ biography (in the column of Bio Statement) is written in the form of narration, including author's full name, place and date of birth, educational qualification/information started from bachelor degree (S-1) until the latest educational degree, the affiliation in which the author is currently working, phone number, and email address.
14. All correspondences, information and decisions for the submitted manuscripts are conducted through email written in the manuscript and/or the emails used for the submission. The status of the manuscript can be checked in the OJS by logging in to the journal.
15. If you have submission queries, please contact jrpm.ppsuny@uny.ac.id / jrpm.ppsuny@gmail.com
