Hello good morning Sir Sümer Aktan.

Please, let me introduce myself. I am Syafika Ulfah from Indonesia. I am a researcher from Universitas Muhammadiyah Prof. DR. HAMKA, Jakarta, Indonesia.

My colleague and I are doing a project on mathematics anxiety and motivation for elementary school students. We read an article with the title The Effect of Mathematics Anxiety and Motivation on Students' Mathematics Achievement by Nadide Suren and Mehmet Ali Kandemir. We are interested in the instrument that they used. We found that it is from yours in the article Matematik Motivasyon Ölçeği (MMO) Geçerlik ve Güvenirlik Çalışması. The purpose if this email is that do you mind if we adapt your instrument and ask for it?

Thank you in advance.

Syafika Ulfah  
Universitas Muhammadiyah Prof. DR. HAMKA  
Jakarta, Indonesia.

Dear Dr. Ullah,

Thank you so much for your mail. Yes, of course you may use my seale on your work. But you know that my scale is Turkish. I adapt it from Pintrich MSLQ scale for primary school student. If you want it I can send to you my scale Turkish version.

Your faithfully

Dear Dr. Ulfah,

I attached Turkish form of the scale. Also I attached my article that I published scale's reliability study.

Your faithfully  
Sümer AKTAN (Ph.D)  
Balıkesir University  
Necatibey Faculty of Education  
Department of Educational Studies
